DDTC Response Team

Note: Information in this message generally discusses controls and information contained in the Arms Export Control Act and the International Traffic in Arms Regulations (ITAR), both of which are authoritative on this matter. The Response Team fields basic process and status questions, and assists exporters in identifying how to get answers to more complex questions handled by the Directorate of Defense Trade Control's licensing and compliance offices. The Response Team's services are not a substitute or replacement for the advisory opinion, general correspondence, and commodity jurisdiction processes delineated in the ITAR, which should be used to obtain authoritative guidance on export control issues, and do not in any way relieve exporters from their responsibilities to comply fully with the law and regulations.
